What Our Clients Says

Thomas Oscar

I did my eCommerce website with them and all looks good and smooth. Harpreet Singh is a good web designer.

Frank Stebbing

Khuram and his team are committed towards surpassing customers' expectations by offering excellent and timely business website solutions.

Vit Kodousek

Recommend Wisdom IT... They developed my company website and it was an excellent job... Love to work with experts.

Client Testimonial from the Projects	
	<p>They designed my logo, and website. Now I am working with them for SEO and Social media marketing. Their team is professional and highly responsive. I recommend them to all business start-ups. I also want to thank Mr. Khuram the MD he is always there for his client's inquiries and assistant.</p>
	<p>Good guys, really helpful and speak sense in a complex, black art Social Media world. As a new supplier to us, they helped recover from a disastrous situation, quickly rebuilding our website from a malicious hack.</p>

Good guys, really helpful and speak sense in a complex, black art Social Media world. As a new supplier to us, they helped recover from a disastrous situation, quickly rebuilding our website from a malicious hack.

I liked the way, Team WISDOM explained us each step. I took quotation from 5 other web developers, but no one was even close to the way Khuram explained me. End results are awesome. I love it.

Branding

Branding is a disciplined process used to build awareness and extend customer loyalty. Branding is about using a variety of ingredients to express why people should choose one brand over another – differentiation. It comes from a desire to outpace the competition, and give businesses the best tools to communicate customers. Brand identity is taking these disparate elements and unifying them into whole systems.

- Garage Website designing
- Search Engine Optimization (Over 30 Keywords 1st-page rankings)
- Google Adwords Campaigns

Technologies we use in our projects
